

7270 PROOF MBS-01 MEBER BARIATRIC STRETCHER 7270

Self loading stretcher for bariatric transport

FEATURES

Self loading stretcher for bariatric transport made of a special high resistance stainless steal alloy. The frame is renforced to ensure a 350 kg maximum payload compared to others MeBer self loading stretchers. It is supplied with 2 frontal Ø125x25 and 2 back Ø125x25 wheels for maximum safety during loading operations. The increased 4 Ø200 mm wheels, 2 fixed with brake and 2 rotating with self-centring system, allow easy manoeuvrability even with heavy loads. The rigid platform, composed by aluminium, is easy to clean and disinfect. It also has an adjustable backrest with lockable gas spring for inclinations from 0° to 80° and fully folding sides. Vertical legs are protected by plastic buffers. This stretcher is supplied complete with mattress (art. 7013) and belts (N. 2 art. 608-A/MEB or 608-N/MEB and n. 1 art. 612/AN-2/MEB or art. 612/N-2/MEB).

Thanks to the increased load capacity it can be used in coupling with the MBP bariatric platform (Article code 12080) and bariatric wings set (art. 12084).
