

## 910 Winner

---

Self loading stretcher

---

### FEATURES

Article 910 has been designed to offer a practical and safe instrument to the operator in case of emergency. The stretcher, built with anodized aluminium, is strong and handy thanks to its four wheels diam. 150, two fixed and with brakes and two rotating. Important feature of this article is the loading height regulation system. The automatic loading stretcher "WINNER" in fact is supplied with two sturdy perforated plates that allow to change the little front wheels height in order to load the stretcher on ambulances of various model and with different inside fittings.

- Back rest and lying part made with thermoplastic material reinforced to allow cardiac massage. Easy to clean and to disinfect
- Adjustable back rest 0° - 80° moved by a gas piston which allow to fix the back rest safely in any position
- Side protections completely overturnable
- Blocking device for folded legs with a system that avoid the compression of the blocking bar
- Safety lever for the legs positioned near the unlocking device allowing thus the release operation for the loading, keeping the hands on the stretcher
- Vertical legs protected by nylon wedges
- Automatic centring device mounted on rotating wheels. This system automatically block the back wheels in the central position during the loading of the stretcher on the ambulance without having to turn the wheels manually
