

9120 Med Ped

Pediatric spinal immobilizer

FEATURES

The spinal immobilizer "MED PED" is ideal for the immobilization and extraction of a patient blocked in an emergency situation as in case of accident. Thanks to its shape and structure, it allows to fix horizontally and vertically the head and spine to limit all the injuries resulting from a wrong transport of the patient. It is supplied with buckles and belts of different colours for an easy usage, padded cushion and two rip-off straps for forehead and chin. Complete with bag for the transport.
